¹ Notice Regarding TurboCourt: In a recent Google Chrome update to v42, users are being prompted that their web browser is not compatible. Google Chrome is pushing forward with eliminating support for certain plugins that affect Silverlight. The e-filing application is built on the Silverlight platform and requires this plugin to be enabled in order to function properly.

At the current time, the Silverlight plugin has been blocked in Chrome v42. There is a workaround that will function for now, however Chrome intends to drop all support for plugins of this type by September 1, 2015. To use the Google Chrome browser v42 with the eFile site now, please follow the instructions at the following link to enable the plugin: [When using Google Chrome, I am receiving a message that my web browser is not compatible.](#)
